

INSTRUCTIONS

Congratulations on your purchase of the Hercules Hook™, the new self-drilling heavy duty drywall hook that lets you Hang Items In Seconds... Without Tools! Quickly and easily hang picture frames, mirrors, shelves, wreaths, holiday decorations, medicine chests and more! Simply push, twist and press it in! No nails, no hammer, no screws or tools required. One hook can hold up to 150 lbs!*

Caution: The tip of the hook is sharp. Avoid contact with tip.

*The amount of weight the Hercules Hook can support will vary based on the type and condition of the wall it is being used on.

IMPORTANT: The Hercules Hooks are only intended for use on drywall, plaster, or paneling. Do NOT attempt to install into studs as it will not properly install or support weight.

(step-by-step instructions on back)

TO INSTALL THE HERCULES HOOK:

1) Pick a point on the wall where you want the bottom of the hook to sit. Then, measure 1/4" directly above that point and securely holding a

Fig. 1

Hercules Hook™ by its arched "Body" in the palm of your hand, align and set the "Chiseled Tip" there. (See Figure 1)

2) Next, with firm forward pressure, twist the hook back & forth (like a key) until you have pushed through the wall.

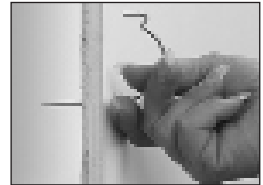

Fig. 2

3) Now turn the hook upward (See Figure 2) and push completely into the wall until only the hook is exposed (See Figure 3).
